

**“Closing the Gap
On the North-South
Connector”**

The North-South Connector is a primary spine of the Downriver Link Greenways Initiative that connects Lake Erie Metropark to the City of Detroit along the Detroit River.

The southeast Michigan ‘Downriver Delta’ communities of Detroit zip code 48217, Ecorse, River Rouge and Lincoln Park fall within the northeast corner of the Downriver Linked Greenways where the North-South Connector and Rouge Gateway connect. As each community developed its own greenway plan, it became apparent that not all plans joined together at the city limits. To attain a cohesive regional greenway network, the communities collaborated to identify various gaps. This document illustrates the outcome of their collaboration – ‘Closing the Gap On the North-South Connector’.
